

Mipa Weld Primer Spray

Mipa Weld Primer Spray is a thin-layer primer that is suitable for many welding processes such as MIG, TIG or spot welding. Due to the very fast drying, welding work can begin shortly after application. A high proportion of active pigments ensures a very high level of corrosion protection.

- Zinc variant: higher corrosion protection properties on iron and steel
- Copper version: higher conductivity
- Covers even in thin layers
- Very good adhesion to steel, iron and galvanized substrates
