

Mipa P88 Light Green

Perfect preparation work to the detail

Mipa P88 Light Green is a pourable, self-levelling 2-component polyester finishing putty to be applied in thin and very thin layers as finishing coat over polyester body fillers. Mipa P88 Light Green is used to close any pin holes and small paint defects (scratches, sanding marks, and so on).

- very smooth surface similar to varnish
- extremely fast and easy to sand, applicable by spatula or brush
- pourable
- adheres on iron, steel, aluminium, galvanised substrates, GRP and wood
