SCOPE OF DELIVERY

HEA SPRAYPACK	2437311
Basic unit SuperFinish 21 Pro	-
Flexible suction system	2444485
HP hose DN6; 15m	2390608
Vector Pro; 1/4"; including TradeTip 3 nozzle holder; with 4-finger trigger	0538040
HEA ProTip 517	554517

HEA HIGH EFFICIENCY AIRLESS

ENAMEL SPRAY PACK	2437312
Basic unit SuperFinish 21 Pro	-
Hopper 3.7 l	2444212
HP hose DN3; 7.5 m	9984583
Vector Pro; 1/4"; including TradeTip 3 nozzle holder; with 4-finger trigger	0538040
TT3 FineFinish 410	554410

INNOVATION SINCE 1947

Perfect surfaces and their added value are our passion. Bringing color, protection and function to surfaces is our mission. We dedicate all of our specialist expertise to your objects and products and support you with personal service. With innovative technologies and highly efficient, reliable and user-friendly solutions, we continue to set new standards in surface technology.

WAGNER GUARANTEE 3+2 EXTRA YEARS

Every buyer of a WAGNER paint sprayer always receives a three-year manufacturer's guarantee. But we can do more: You can extend this guarantee for another two years free of charge by registering online!

HEA TECHNOLOGY

HEA stands for High Efficiency Airless, an innovative tip technology that revolutionizes airless spraying. HEA tips make it possible to reduce the pressure of the sprayer significantly to work at a low-pressure range (ideally at 80 - 140 bar). The tips can be used with all TradeTip 3 nozzle holders and WAGNER airless devices.

HEA HIGH EFFICIENCY AIRLESS

Standard airless technology

DIAPHRAGM PUMP

Do you want to process different materials, from primers to silicate paints, with just one device? Then a WAGNER diaphragm pump is the ideal choice. With this powerful, maintenance-friendly technology, the material is conveyed via the lifting motion of the diaphragm.
Diaphragm pumps from WAGNER are robust, easy-to-use and suitable for construction sites and workshops.

1. SUITABLE FOR SMALL QUANTITIES:
Diaphragm pumps have up to 58 percent* less material in the system. Thanks to the small cross-sections in the device, they can also be operated with very small amounts of material. this saves material during material changes and during the cleaning process.

2. LOW MAINTENANCE AND DURABLE:
Due to the reduced lifting frequency of the diaphragm, the already small number of wear parts are subjected to significantly less stress. This significantly reduces maintenance costs*. Should a repair be necessary, the relevant components can be easily and directly replaced on the job site, for example both valves within minutes.

3. FINE AND EVEN SPRAY PATTERN:
The diaphragm technology reduces the pulsation of the material flow, which avoids any irregularities in the spray pattern. It will be very fine and even. Additionally, the switching point of the piston is eliminated in a diaphragm pump.

*Compared to standard piston pumps

Piston pump: irregular spray jet

Diaphragm pump: even spray jet

SUPERFINISH 21 PRO

BE UNSTOPPABLE!

go.wagner-group.com/contractor

SUPERFINISH
21 Pro

Motor Output	0,9 kW
Voltage	230-240 V AC, 50 Hz
Max. Tip size	0,021"
Max. operating pressure	207 bar
Max. delivery rate	2,1 l/min
Hose length	15 m
Item numbers	HEA 2437311 Enamel 2437312

Solvent-resistant suction system – for small paint quantities it can be quickly converted to a hopper

Modular system – for use with the flexible suction system or hopper

HEA Pressure Gauge – pressure regulation from 0-207 bar for maximum control and a perfect surface finish

HEA 517 Tip – for a gentle spray pattern with minimal mist, even at low pressure levels

3.7-liter hopper – ideal for small paint quantities or frequent material changes

Inlet and outlet valve – quick and easy access to common wear parts to reduce downtime

Highly efficient and maintenance-free motor – minimal electronics and highly robust against voltage fluctuations

RECOMMENDED APPLICATION

MATERIALS:

- Water- and solvent-based paints, varnish, oils, release agent
- synthetic resin paints, PVC lacquers, 2-component Varnishes
- Primer, filler
- fire protection paints, Anti-rust paints
- Emulsion, latex paints, adhesives, sealants

OBJECT SIZE:

<50 m² **50-200 m²** **200-800 m²**

SPRAYGUIDES

This is where you'll find answers about how to set up your device to suit the material and which paints and lacquers give the best spray results with your WAGNER model.
