

ANEST IWATA

W-300 WB

Split nozzle technology saves material and atomisation is best in class

Lightweight design

Nozzle sizes available from 1.0 - 1.4

**SPLIT NOZZLE™
TECHNOLOGY**

**HIGH TRANSFER
EFFICIENCY**

The W-300 WB is designed for smart repair applications, handling primer, base coat and clear coat applications. With its compact fan pattern between (23-25cm) the W-300 WB is perfect for smart repairs, whether it's working on alloy wheels, bumpers, or wheel arches the W-300 WB will handle any repair work.

The W-300 WB has a compact and flat fan pattern, this helps to keep repairs compact without unnecessary colour drift and overspray. When dealing with medium-sized repairs the W-300 WB makes the repair process quick and simple.

Using less air than a full-sized spray gun the W-300 WB is perfect for the mobile repairer or refinish technician on the go. Base coat applications are made easy with the W-300 WB, colour replication and laydown are Anest Iwata's priority. Clear coat performance is precise and reliable, helping you get through jobs without hesitation.

**LOWER NOISE
LEVEL**

**EASY TO
MAINTAIN**
