

/// FINISHCONTROL

For touch-up work or minor renovations, FinishControl impresses with its ease of use, versatility and precise adjustment options.

FINISHCONTROL 3500 PLUS

Handy XVLP paint sprayer for beginners and experienced users

Thanks to its simple operation and compact size, FinishControl 3500 Plus is the perfect choice for both experienced users and beginners. The paint spray system is the perfect partner for painting, touch-up and repair work as well as for smaller projects such as coating door panels and accent walls. FinishControl 3500 Plus is light and easy to handle. The device works with XVLP technology (Extra Volume Low Pressure), an atomization technique based on HVLP technology (High Volume Low Pressure), but with an even higher atomization performance. The spray pattern is therefore particularly fine and even. The small number of components makes cleaning quick and easy.

DirectSprayControl:
Precise and easy handling due to variable material and air volume regulation, as well as adjustment of the spray pattern directly on the gun

Spray attachment StandardSpray:
Pleasant to work with due to low spray mist and compact, extra-light design

Click&Paint system:
For fast spray attachment changes and easy cleaning

Powerful turbine:
Particularly efficient, low-maintenance and compact

Compact and lightweight design:
With ergonomically balanced weight distribution for fatigue-free working

2-stage trigger:
Smooth-running for precise work.
Level 1: Start of the turbine,
stage 2: Start of the material flow

SCOPE OF DELIVERY	
FinishControl 3500 Plus base unit	-
StandardSpray spray attachment	2430386
Transport bag	2454642
Riser tube filter	-
Cleaning set	2430409
FINISHCONTROL 3500 PLUS	**2477878**

TECHNICAL DATA	
Voltage	230 V / 50 Hz
Motor power	700 W
Operating pressure, max.	0.2 bar, 0.02 MPa
Container volume	1,000 ml
Weight	2.2 kg
